Remove the guesswork. Make complicated repairs simple with ALLDATA Repair!

ALLDATA
 AUTOMOTIVE INTELLIGENCE

Diagnostic and repair data direct from the manufacturer

Make sure you circle ALLDATA Europe on your list of 'must-see' exhibitors, to discover how sophisticated jobs can be simplified.

ALLDATA Repair provides garages and bodyshops with accurate and unedited OEM repair data:

- 29 VM licence agreements
- 91,950 make, model, engine and year vehicle combinations – that's 95% of vehicles on the road today!
- Six million technical drawings and wiring diagrams, including electrical connector views
- All accessible in seconds!

WHY DO GARAGES NEED US?

Oldfields Garage Owner, Tim Benson, is well-placed to explain: "We had a fuel filter on a Volvo, a type that we'd never seen before. The fitting was different to ones seen previously.

"We logged onto ALLDATA Repair and found the exact procedure for replacing the fuel filter. It showed the type of clip and how it opened. Using ALLDATA Repair meant we were able to complete a 30-second job; whereas, before we invested in ALLDATA Repair, we probably would've broken the clip and ended up having to buy a fuel line. It'd be our fault and we'd have to explain that to the customer."

WHY DO BODYSHOPS NEED US?

Car Body Solutions General Manager, Peter Shuff, revealed that "within five minutes, I knew I had to have ALLDATA Repair in my bodyshop".

He recalled: "There was a brand-new Hyundai EV in the bodyshop. I had to disconnect the battery and take the wiring loom out. I knew how to power down the vehicle, but I wasn't sure how to remove the wiring loom. I assumed that it would come out via the rear of the vehicle; however, after entering the vehicle registration into ALLDATA Repair, I was surprised to learn that, actually, the loom came out at the front! If I hadn't checked ALLDATA Repair, I would have removed the panels at the back and stripped the boot out. ALLDATA Repair provided me with the step-by-step instructions and saved me an hour."

WANT TO DISCOVER MORE?

Join us on **7th June at 1:15pm** in the **Workshop Hub at Automechanika**, where our technical support specialist, Steve Derham, will be joined by a panel of independent experts to discuss all things repair data: trends, challenges and necessity!

192 hours of free skills training and live hands-on demos for the whole workshop team

THE WORKSHOP TRAINING HUB

Here, a packed programme of technical seminars will be delivered by respected specialists, addressing the advancements and challenges facing the service, repair and maintenance sector. Covering a range of topics such as engine fault diagnostics, MOT, diesel, ADAS and more.

In association with

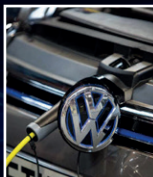

Sponsored by

THE EV TRAINING HUB

An increasingly popular programme highlighting the requirements and opportunities available to the aftermarket to adapt to hybrid and electric vehicle service and repair. A must-attend programme for anyone intending to service and repair vehicles in the immediate future and beyond.

Sponsored by

EV TRAINING ACADEMY

The IMI and Our Virtual Academy team up to deliver a programme of Beginner and Advanced training sessions, supported by two demo vehicles so visitors can get hands-on, practical EV advice by renowned industry experts.

In partnership with

THE KEYNOTE CONFERENCE

DAY ONE: SUPPLY CHAIN CONFERENCE

This high-level programme will provide you with the insights required to confront sector challenges and identify opportunities currently being created in the UK's automotive supply chain, to ensure UK suppliers benefit from the fast pace of change.

In association with

Sponsored by

DAY TWO: AFTERMARKET CONFERENCE

Expect to hear from industry figureheads and experts who will present, debate and enlighten delegates on the topics which are going to shape your business and provide opportunities to remain successful in a fast-evolving sector.

In association with

DAY THREE: THE STUDENT PROGRAMME

We welcome the next generation of industry professionals, and have created a programme specifically for 250 college visitors so they can experience the potential of the industry and the opportunities available with a range of employers.

In partnership with

WOMEN IN AUTOMOTIVE NETWORK

An opportunity to come together and share ideas on how we can continue to attract a more diverse workforce to the UK automotive industry. Everyone is welcome.

Drinks – 7th June, 12.30-2pm.

Hosted by

In partnership with

THE BODYSHOP TRAINING HUB

In association with Bodyshop Magazine, these sessions will provide the latest updates, advice and technical innovations for the UK's Collision Repair sector. Covering ADAS, body repair, EV repair, paint, refinishing, BS10125 and more, the topics will be presented by renowned industry figureheads and experts, ensuring you're getting the best information available to the sector.

In association with

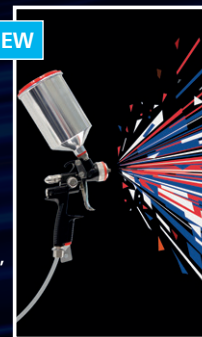

In partnership with

PAINT & SPRAY LIVE

An opportunity for you to witness paint and spray demonstrations, seeing the latest paints and sprayguns in action within our fully ventilated and operational spraybooth, courtesy of Masterflo.

MODERN GARAGE

Launching or developing a customer-first, highly efficient workshop doesn't cost the earth, and our partnership with LKQ Euro Car Parts at this year's Automechanika will showcase all of the solutions available to help you future proof yourselves, increase revenue or be more efficient!

In collaboration with

COLLISION REPAIR LIVE

Live demonstrations from leading suppliers to the UK repair sector will ensure bodyshop visitors get first-hand experience of the latest products and techniques to help them perform their tasks more effectively and efficiently.

ADVANCED EV TRAINING

Plug-in Charging: Proximity pilot circuit.

In this session, you'll learn about the proximity pilot circuit used in the Type 2 plug-in charging system. Type 2 is the most common method for charging plug-in hybrids and electric vehicles, and much like any electrical system, there's more than enough potential for faults. So, during the training, you'll look at the details of Type 2 charging, including wall boxes and differences between cables, as well as the function, operation, and testing of the proximity pilot circuit.

ESSENTIAL EV TRAINING

HV System Isolation: Low-voltage service disconnect.

In this session, you'll learn about the high-voltage isolation process using a low-voltage service disconnect. The device is becoming an increasingly popular solution used by vehicle manufacturers. We'll compare this solution to other types, explain its function and operation, plus some top tips for disconnecting and reconnecting the device during the high-voltage isolation procedure.

Core Diagnostics appoints Neil Hilton as Technical Sales Director

Core Diagnostics has appointed ADAS expert Neil Hilton as it sets its sights on being the UK's leading provider of remote support services.

A comprehensive cloud-based solution for programming and coding of new parts that assists technicians with thousands of repair challenges each month, as well as providing remote support with ADAS calibrations, Core Diagnostics has built a loyal customer base of accident repair centres, nationwide glass companies and general workshops, as well as providing a 'white label' support service to a number of well-known diagnostic brands who have recently launched remote services in the UK and Europe.

ADAS calibration accounts for an increasing number of the job tickets that Core Diagnostic receives, with users benefitting from increased workshop productivity and enhanced customer satisfaction as a result of faster key-to-key times.

As the rapid growth of ADAS showing no signs of slowing, Core Diagnostics has recently made a number of high-profile appointments to strengthen its expertise in this area, the latest being Neil Hilton, who takes up the post of Technical Sales Director. Neil joins Core Diagnostics from HELLA where he spent over thirteen years as Head of Garage Equipment, a role in which he was instrumental in launching the Hella Gutmann brand within the UK and for its rapid ascendance to become one of the leading suppliers of diagnostic and ADAS calibration tools.

An ADAS "expert", in 2018 Neil became a member of Thatcham Research's ADAS steering group and consulted on the development of the Insurance Industry Requirements for the safe repair of ADAS equipped vehicles (IIR) introduced in 2021.

In his new role at Core Diagnostics, Neil is keenly focused on further accelerating the brand's growth as it seeks to become the market leader in remote diagnostics.

Commenting on his new position Neil says "With vehicle systems being ever-more sophisticated, ADAS calibration and coding and programming of new parts can be challenging at the best of times. In recent years we've seen remote diagnostics become an increasingly valuable workshop tool and I'm in no doubt that it's the future.

Core Diagnostics were among the first to recognise this and their unrivalled investment in systems and expertise has put them at the spearhead of this new technology. I'm excited to join the team and look forward to helping to make Core Diagnostics the number one brand in remote support."

Mark Fleming, CEO of Core Diagnostics comments: "I'm proud of the reputation that Core Diagnostics has already established in the market and as we look to scale the business I'm delighted that someone so highly respected – and knowledgeable about ADAS – as Neil recognises the potential for remote diagnostics, shares our vision for the future and is excited to be part of this journey."

MANNOL UK – STAND P90

We will have brand ambassador **Abigail** **Andre** on stand (The Girl Who Talks About Cars)

AUTODATA – STAND T72

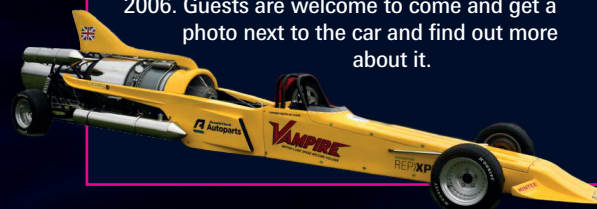

Get your photo taken with this years Mercedes-AMG PETRONAS Formula One challenger, collect your photo from the Solera stand at T72.

LASER TOOLS – STAND M120

Attending on 6 June for one day only will be **Jake Hill**, driver of #24 BMW 330e M Sport for **Laser Tools Racing** with MB Motorsport.

ARNOLD CLARK AUTOPARTS – STAND Q70

Arnold Clark will have the famous **Vampire** jet car on their stand, which has twice set the land speed record in the UK, and infamously crashed by former Top Gear star **Richard Hammond** in 2006. Guests are welcome to come and get a photo next to the car and find out more about it.

T10 AUTOMOTIVE – STAND L134

Mechanic Mindset, the YouTube online influence, will be on stand L134 for two of the days, doing demos, speaking to visitors, and running competitions.

ALLIANCE AUTOMOTIVE UK – STAND R130

Meet **Dan Rowbottom** and **Ash Sutton**! Dan and Ash will be attending on the Alliance Automotive stand on 7 and 8 June, providing the chance for people to have an exclusive chat with the BTCC drivers. Plus there will be photo opportunities for any racing fans to grab a quick photo with them.

NITERRA UK LTD (FORMERLY NGK SPARK PLUGS (UK) LTD) – STAND E90

Meet British racing driver **Nic Hamilton**! On Tuesday, the talented brother of seven-time World Formula 1 champion Lewis Hamilton will be on the Niterra stand. Not only that, but North Yorkshire-based racing car driver Max Coates will also be on the stand on Thursday! Don't miss.

HELLA LTD – STAND Q90

Hella Gutmann will be showcasing the mega macs X and the macsRemote, as well as the latest CSC Tool-Digital for ADAS calibration. Hella is also a forerunner when it comes to lighting, so this important product group will be represented by the Black Magic range of auxiliary lights and lightbars.

MANNOL UK – STAND P90

MANNOL UK will have YouTube influencer **Officially Gassed** on their stand.

FPS COMPRESSORS LTD – STAND G68

FPS Compressors are launching a new G-TEC full feature screw compressor.

CZECH REPUBLIC PAVILION – STAND X70

Leave your business card at the **Czech Republic Pavilion** stand and you could win the following: two different commemorative coins with Czech industry motives; sets of piston rings; bottles of Czech beer.

CORE DIAGNOSTICS – STAND Z106

Daily prizes worth £1,000!

PMF/PM – STAND ZZ72

You are invited to participate in the **PMM** red carpet photo event! On top of receiving a free PMM t-shirt, each participant will be put into a prize draw to win an essential piece of workshop equipment.

LIQUI MOLY GMBH – STAND J40

Liqui Molly will have **Matty Evans** Racing Lamborghini Huracan on the stand. (GT Cup driver). They will also have a MotoGP bike on the stand (to be confirmed which model).

3D GROUP: AUTOMOTIVE LOCKSMITH SUPPLIES & OSCA DIAGNOSTICS – STAND Z72

Exclusive discounts off the OSCA 2.0 cable, as well as chances to win prizes and OSCA goody bags.

PatFluid®

Additive for Diesel Particulate Filters

NEW PatFluid® Bag Range

At Automechanika, we're excited to showcase our newly released PatFluid Bag product range.

- PatFluid Bag range designed specifically for vehicles with flexible pouch DPF additive dosing systems.
- The new Bag range is pre-filled with PatFluid additive ensuring easy and quick replacement.
- This complements our current offering of the PatFluid 1L, 5L and Transfer Kits for vehicles with tank reservoirs.

PatFluid is our aftermarket replacement for DPF additives which is used by various passenger car and van manufacturers.

For more info, please see our website, or visit us at Automechanika.
